Brandan Pratt

Website Developer | Full-Stack Developer

(242) 825-3991   **brandan.pratt1@gmail.com**   [LinkedIn](#)   **Nassau, Bahamas**

Website Developer with 4+ years of experience designing, deploying, and maintaining production websites and web platforms across government and enterprise environments. Strong front-end and CMS experience with HTML5, CSS3, JavaScript, React, and WordPress, alongside deep ownership of hosting, deployments, performance, and uptime. Proven ability to manage full website ecosystems, collaborate cross-functionally, and ship stable, scalable web solutions aligned with business goals.

Professional Experience

Ministry of Economic Affairs - Digital Transformation Unit

Software Developer   **August 2023 - Present**

- Designed, deployed, and maintained 10+ production websites on Plesk servers, ensuring performance, uptime, and cross-device compatibility for public-facing government events serving 500+ users.
- Built responsive front-end interfaces using HTML5, CSS3, JavaScript, and API integrations for internal and public systems.
- Owned full website lifecycle including hosting, builds, deployments, debugging, and updates across multiple environments.
- Developed dynamic front-end functionality for badge generation, dashboards, and data visualizations using JavaScript and REST APIs.
- Conducted testing, debugging, and log analysis to identify and resolve production issues before and during live events.
- Collaborated with stakeholders and leadership to translate operational requirements into functional web solutions.
- Implemented performance and reliability improvements that reduced manual processes and improved user experience.

Plato Alpha Designs

Full-Stack Developer   **August 2022 -July 2023**

- Developed and maintained client websites using PHP, WordPress, and custom front-end components.
- Managed Linux-based hosting environments, ensuring website stability, performance, and secure deployments.
- Implemented SSL certificates, resolved mixed-content issues, and ensured compliance with web security standards.
- Automated website deployments and updates across multiple production environments.
- Provided ongoing website maintenance, debugging, and client support across application and server layers.

Bahamas First General Insurance

Software Developer   **May 2021- July 2022**

- Designed and implemented front-end UI improvements that enhanced usability and customer experience.
- Built and optimized web application features using modern JavaScript frameworks.
- Collaborated with cross-functional teams to deliver web features on schedule and at scale.
- Produced technical documentation supporting long-term website and application maintainability.

Education

Bahamas Technical & Vocational Institute   **August 2020 – present**

- Associates Degree in Network Engineering (In Progress, 37 credits, GPA: 3.189)
- Relevant Coursework: Linux Administration, Database Management, Python, Java, IT Fundamentals

Certifications
